CONCRETE WORKS

## PRECAST CONCRETE STREET LIGHT FOOTINGS

Precast concrete lighting footings are used to support street light poles. These precast concrete lighting footings are a cost-effective alternative to poured-in-place footings. Our footings are available in a wide range of sizes, weights and mixes.

High compressive strength and density combined with low absorption are important to the long-term durability of the concrete. Lower-quality concrete can deteriorate in under a decade due to the aggressive environment that the roofs and the ballasts create.

We manufacture our footings in our Umm Al Quawain factory and ship across UAE. Our production facility is capable of manufacturing over 150 units per day

# STREET LIGHT FOOTINGS

## Leading Manufacturer of Precast Concrete Street Light Footings

Beamconcretework is the leading precast concrete street light footings manufacturer in the UAE with supplies across the region. We manufacture customized and designed street light footings to your liking.

## Features of Our Precast Concrete Street Light Footings

- With a few exceptions, the majority of these may be installed in within 15 minutes.
- Pre-pour inspections are no longer conducted on-site.
- Installation is easier and you have greater control over your timetable.
- Consistent bolt patterns and specific conduit positioning ensure a smooth cast finish.
- The diameter and height of our precast concrete light pole bases range from 12 inches to 144 inches.
- We deliver for free to construction sites across Northern Ohio.
- For an extra cost, we can use our crane trucks to help you lay the foundations.

## Foundations Built To Your Exact Specs

Our precast concrete light pole foundations arrive on your jobsite ready to exceed not only your expectations, but also your requirements. It's no problem for Beamconcretework, which is made under strict conditions, to provide bespoke diameters, bolt patterns, and conduit locations. Where can I find connectors? There's no need to worry about it either.

## Beamconcretework Manufactures Various Sizes And Deliver Within Agreed Timeline

Round, square, tapered, or pyramid-shaped precast light pole bases are all available from Beamconcretewor. A precast concrete light pole base, whether round or square, can be manufactured in any height and in most standard sizes. Because our light pole bases are custom-made to order, we are usually able to fulfill any project deadline.

As a result of Beamconcretework's extensive inventory, you may get up and running in only a few hours of placing your order if your schedule demands it. Let us quote your next project if you're a contractor who still pours these materials in place.

Light pole bases made of precast concrete are ready to be installed in any conditions. With precast concrete light pole bases, there are no structural or cosmetic difficulties, as well as no need to worry about the right alignment of anchor bolts or conduit orientation.
